

Claims:

- 5 1. Clip for clamping sheets of paper, plastic, metal etc. at their corners or sides, which is configured U shaped, one-piece or multipart with two limbs of the same or different shape, with the stack of sheets being clamped between both limbs, by these alone or by means of projections incorporated into them and the force of the pre-tensioned back, characterized by the fact that it is configured one-piece triangular or trapezoidal or semicircular or semielliptical with limbs (1, 1a or 1b) that
10 are arranged parallel to each other when in the relaxed state, with both limbs (1, 1a or 1b) comprising a small fold (3), which is inwardly curved and which bends to form an acute or obtuse angle (3a), on each side (4) forming an acute or obtuse angle (4a) with the back (2) or on each vertex (8), and that it consists of metal or high-strength plastic or wood or compressed cellulose.
15
2. Clip according to Claim 1, characterized by the fact that, both in the relaxed state of the clip and in the state with a clamped stack of sheets, both limbs (6) are arranged on top of each other and parallel to each other by means of a spring (7).
- 20 3. Clip according to Claim 1, characterized by the fact that it is made to be multipart, with both limbs (6) being connected by means of a spring (7) without making mutual contact.
